## 5 SECTION 5 : FIREFIGHTING MEASURES

<b>5.1 Extinguishing media</b>	<p>The product is not flammable. Fire hazard low due to the flammability characteristics of the product under normal storage, handling and use conditions.</p> <p>Suitable extinguishing media:</p> <p>In the event of a nearby fire or continued combustion, caused by improper handling, storage or use, the following extinguishing media may be used: carbon dioxide (CO<sub>2</sub>), foam, chemical powders, and in the event of a widespread fire, also water spray.</p> <p>Inappropriate extinguishing media:</p> <p>In case of fire, do not use: Water jet</p>
<b>5.2 Special hazards arising from the substance or mixture</b>	<p>Due to its flammability characteristics, the product does not contain a fire hazard under normal conditions of storage, handling and use.</p> <p>A fire in the surrounding space will often produce thick black smoke. Exposure to compositional products may result in health hazards. Do not breathe fumes.</p> <p>Decomposition products may include the following materials:</p> <ul style="list-style-type: none"> <li>oxides of nitrogen</li> <li>phosphorus oxides</li> <li>Carbon Dioxide</li> <li>Carbon monoxide</li> </ul> <p>This product is toxic to aquatic life. Fire water contaminated with this product should be contained and prevented from being discharged to a watercourse or sewer.</p>

**Advice for firefighters**Protective actions to be taken when fighting fires

Quickly isolate the site by evacuating all persons from the area near the incident in case of fire. Do not take any action involving a personal risk or in the absence of adequate training. Keep containers away from fire if it can be done without risk. Use water or water spray to keep containers exposed to fire cool.
